Wildlife Viewing Tips

- Dawn and dusk are the best times to view wildlife. During summer, many animals escape the midday heat by staying among the trees.
- Get wet! Moose and waterfowl are active in rainy weather.
- Be patient! Stop and look around, kick back and wait to see what will wander by.

Stay Safe and Protect Wildlife

- Keep a safe distance from all wildlife. If an animal notices you by lifting its head, looking at you or listening to you, you are too close and should back away.
- Travelling in groups and making noise will let wildlife know you are nearby.
- Late summer and early fall is elk and bison mating season; be especially aware of wildlife along trails at this time.
- If you encounter elk, moose or bison on a trail make yourself known by singing a song or whistling a tune. Walk slowly around them at a safe distance or return the way you came.
- Do not feed wildlife;** they have a greater rate of survival and are healthier when they feed on natural food.
- Keep your pet on a leash and under physical control at all times. Dogs can provoke defensive behaviour in bears and other wildlife.
- Read *Bear Country* and *Bison Country* brochures, available at any park facility.
